

Keyur Patel

FULL STACK DEVELOPER

Surat, Gujarat, India | keyur823827@gmail.com | +91 98245 08857 | [linkedin.com/in/keyur-74742](https://www.linkedin.com/in/keyur-74742) | github.com/keyur982

PROFILE

Full stack developer with **4+ years at a product startup**, shipping whatever the product needs — real-time **AR try-on experiences** in the browser, **e-commerce platforms**, and **ERP-driven backends**. Equally at home on the frontend, backend, or platform layer; I own features end to end and pick up new stacks quickly as priorities shift.

TECHNICAL SKILLS

FRONTEND	React, TypeScript, JavaScript, Three.js / React Three Fiber, HTML5, CSS3
BACKEND	Node.js, Express, PHP, Python (Frappe), REST APIs
DATABASES	MySQL, MongoDB
PLATFORMS	Frappe / ERPNext, OpenCart (Journal theme), Git

EXPERIENCE

Full Stack Developer · Plushvie Retail Pvt. Ltd.

Oct 2021 – Present

Ahmedabad, India · Promoted from Intern to full-time, Jan 2022

- Built the company's early AR products — a **browser-based jewellery virtual try-on** and an **AR video-calling web app** — end to end with vanilla JavaScript, HTML, and Node.js / Express services on MySQL.
- Owned the **AR augmentation layer** of the upgraded try-on application, implementing real-time rendering with **Three.js / React Three Fiber** on its React + TypeScript frontend.
- Developed the **e-commerce admin platform** (React, Node.js, MongoDB) — catalogue and order management, role-based access control, theme customisation, and activity logs.
- Currently rebuilding admin and backend capabilities on **Frappe / ERPNext** (Python), exposing REST APIs consumed by the mobile apps and website.
- Delivered multiple **OpenCart storefronts** (PHP, MySQL, Journal theme) on tight timelines, plus a standalone console for managing the try-on product catalogue.
- Own features end to end — requirements, build, release, and debugging production issues across several live applications.

EDUCATION
